

Question 6

Exhibit 6.15

QUALITY TECHNOLOGY QUALITY PEOPLE

*"Their systems and technology are very reliable... their people care about my business." - David VanRenswryk
Burma Electronic Distributing, Inc.*

At US Signal technology is a given. We spare no expense to install the most advanced communications technology available today. Our engineers work tirelessly to provide our customers with all that telecommunications has to offer. However, quality technology is only useful if quality people are part of the equation. Our people are used to providing creative solutions to your business needs. That's why our customers believe we're different. Our customers know that our people really care about them. We demonstrate it to them every day. We're sure you'll see the difference too.

WE KNOW YOUR MARKET

"They make it a point to work with me to help us be more productive."

*Sandra Wilcox
Wienmark, Inc.*

We are a West Michigan Company with West Michigan roots. We know this market, it's our market too, and we know the factors that affect you every day. We know the business climate. We know the people. And that makes us very good at providing your business with the best advice on local phone services. Our customers depend on our knowledge, so we give them the information they need when they need it. We are ready to make our knowledge your business asset.

COMPETITIVE SERVICE COMPETITIVE PRICES

*"We've found no better combination of price/value." - Tom Hakewell
Reformed Bible College*

Competitive prices and quality of service have always been US Signal's trademark. With local phone service we offer your business Standard and Digital Business Lines, Direct Inward Dialing, and ISDN (PRI). We'll also be bringing you advanced call features like Call Forwarding, Call Waiting, Caller ID, Voice Mail, Conference Calling, and many, many others. With competition finally here you can be sure that we'll give our customers what they want and need. We always accomplish what we set out to do. We think you'll soon agree.

or level of Customer Care,
we'll pay your way back to Ameritech
anytime in your first year of service.**

EASY TO SWITCH

*"Switching to US Signal is easy, simple and painless." - Pete Rose
Voice Data Systems*

You can retain your present number when you change service to US Signal. The changeover process has been carefully designed to minimize any impact on your daily schedules. We work closely with your phone equipment vendor to ensure the change over is timely and successful. Our customers will tell you that we consider carefully each and every detail. They know that we don't like having anything disrupt your business. We believe you'll understand this when you make the change.

US SIGNAL

*"At the heart of our efforts is the desire to provide for our customers the best that we, as an organization, are capable of... our employees prove this to our customers every single day." - Randy Velthamp
President, US Signal*

US Signal is the first company in the country to bring to you a true alternative to Ameritech. This finally puts the consumer in the driver's seat. US Signal has provided long distance service in this region for over ten years and has grown to be one of the largest long distance providers in the Midwest. Now we are coming to our home base to introduce our local telephone services. Many of our customers call Grand Rapids home. We care about this community and the businesses that thrive here. We hope that you'll take the time to consider a home town company as your local phone provider.

US-SIGNAL
CORPORATION

Advanced communications. Clear and simple.

2855 Oak Industrial Dr. NE
Grand Rapids, MI 49506-1277
1-800-7-SIGNAL

US Signal would like to offer you something other than the standard business line

These days it seems as if there's a lot of static from the telecommunications industry when it comes to serving the business customer. At US Signal we don't want any part of it. Instead we'd like to make the idea of managing advanced communications a whole lot easier. Offering you products and ideas with clear advantages. Not to mention ones that are simple to implement in reality that begins by listening a lot more than by talking. And that's what we do best.

A Virtual Office As Close As A Touch-Tone Phone.

US Signal's Magic Number is a personal communications system that simplifies communication for mobile professionals. Through a single phone number, Magic Number provides the seamless integration of voice messaging, call forwarding, calling cards, conference calling, paging and address list management.

Fiber-Optic Communications.

Through our own fiber-optic network, US Signal provides high quality local communications to several major metropolitan markets. These state-of-the-art direct fiber connections offer businesses a competitive and economic alternative for voice, fax, data and video transmissions.

Advanced communications. Clear and simple.

With the advent of the information age, the telephone has become the gateway to increasing business productivity. It's grown from a simple calling device to a comprehensive system for managing your business communications.

To service our customers, US Signal has been working to make your path on the information highway an easy one. We've done that by offering all the telecommunications services that are vital to a growing business. And we've made sure that our services are as user-friendly as possible. Our current offering includes:

- 400 Services
- Domestic & International Calling
- Data & Video Transmission
- Voice Messaging
- Executive Management Reports
- Paging
- Conference Calling Services
- Calling Card
- Operator Service
- Local Phone Service

Competition For Local Phone Service.

Due to recent legislative approval, US Signal has become one of the first companies in the country to receive a license to offer competitive local telephone services. So not only will you have a choice when it comes to local telephone service, you'll be gaining a host of innovative services that US Signal has created for the communications marketplace.

US-SIGNAL™
CORPORATION

Advanced communications. Clear and simple.

A Telecommunications Company That Is Easy To Work With, And Easy To Reach.

At US Signal we've grown to be a market leader in telecommunications services by providing real innovation to our customers. But our greatest advantage remains our commitment to a very basic business philosophy: listening to our customers.

This kind of commitment, of course, has led to partnering with our customers and providing business communication solutions for

today and tomorrow. It's basically how we've built a continuous record of growth since our founding in 1983 — becoming one of the top interexchange carriers in the U.S. And it's why we're recognized as having the highest customer-retention rate of anyone in our business.

If you'd like more information about US Signal, it's as easy as calling 1-800-753-0642.

**What if
anyone could
reach you
at any phone,
anywhere,
through just
one number?**

**You'd have
a big office**

INTRODUCING

MAGIC
NUMBERSM

**You're never
out of touch.**

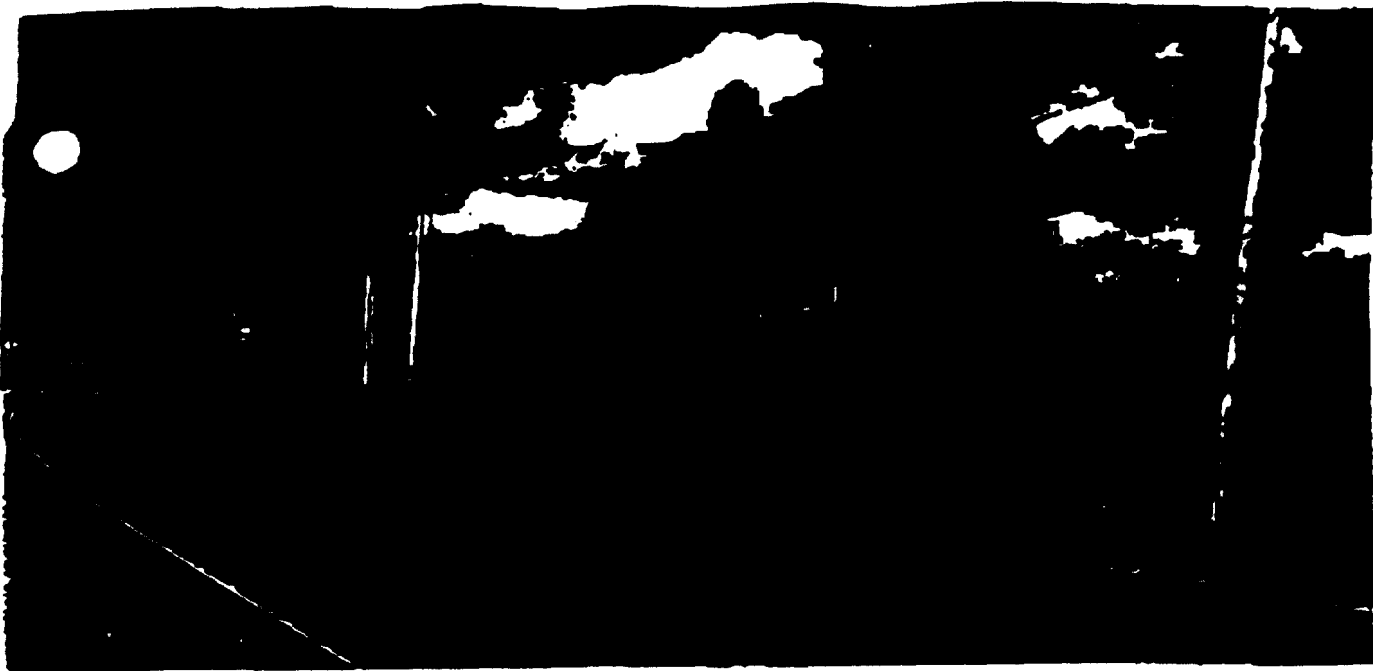

Today in business, there's no shortage of phones. Or phone numbers. You've got a number at work. A fax number. Perhaps a pager or cellular number. And a whole new set of numbers when you're out on the road — from your hotel room phone to the number at your client's office.

The only thing you don't have is a number that can make it all work together. That's Magic NumberSM from US Signs. With Magic Number, you can be reached at one number anytime. So you never miss an important call.

You don't have to give out a list of numbers where you "might be" to clients, associates or family. You get your own personal 800[®] that always receives you, calls and lets you call and send messages.

And that's just part of the magic to the number.

Your office travels with you.

Being out of the office is a juggling act.

Adding one place for messages. Leaving replies on different voice mail systems. Returning calls on the fly.

But not with Magic Number. It integrates all of your telecommunications resources into one easy-to-use service.

You don't need a new phone. Or any new equipment. You just need Magic Number, with its powerful combination of features:

"Follow-Me" Programming — you can use any touch-tone phone, day or night, to direct calls to reach you at any number. So you can be in a car, a client office, or hotel room, and still get your calls.

Voice-Mail — let's you receive, send and transfer messages. When the "Follow Me" feature is turned off, your voice-mail activates instantly. Callers can leave up to 5-minute messages after your own personal greeting. When you call Magic Number, your messages are waiting.

Outbound Calling — you can make calls by pressing a single key. You don't have to hang up and redial.

You're in control.

Getting around on business is hard enough without having to navigate through a complex telephone menu. Magic Number is simple.

You can access Magic Number by just dialing it and a 3-digit code. Then quick one-touch letter codes help you get things done.

T Touch 'T' to listen to your messages.

R To reply to a message, press 'R' and Magic Number will automatically connect you to the other subscriber's voice mail.

C Press 'C' for making any out bound calls. You never have to use a cumbersome multiple digit calling card code.

F Touching 'F' directs your personal 800* to follow you to any phone.

Magic Number's voice mail system lets you create custom lists you

can use to easily distribute messages. You can send a message to everyone on a list instead of having to make multiple messages and calls.

Setting up 3-way teleconferencing is easy, too. Simply press 'T' for teleconference.

Voice mail. One-touch calling. 100% incoming call completion. A world of powerful telecommunications options, all at one number. Magic Number.

**What if anyone could
reach you at any phone, anywhere,
through just one number?**

You'd have a Big Office.

Introducing Magic Number

Magic Number puts you in control of a powerful communications tool that allows any touch-tone telephone to become your instant office. Your personal 800 Magic Number integrates all your telecommunications resources into one easy-to-use service that insures 100% call completion.

Follow-Me

Never miss another call! Turn on Follow-Me and Magic Number will ring anywhere you choose for as long as you choose - in your car, on your remote telephone, at your regional office, at your hotel, at home... When Follow-Me is off, callers are able to leave a personal message through Voice Messaging.

Voice Messaging

Your calls are always answered with Magic Number. When you're not available to take a call, Voice Messaging allows callers to hear your personalized greeting and leave you a detailed message. Magic Number Voice Messaging is fully featured - receive, send and save messages; reply or transfer messages to other Magic Number subscribers; record personal greetings; and create your own Address Book and distribution lists.

Paging

You're assured of timely notification of your voice messages with Magic Number's Paging option. Magic Number works with your pager to notify you of new and urgent messages.

Outbound Calling

The Call Out feature of Magic Number makes life easier when you're on the road. Make local, long-distance and international calls with the touch of a key, without hanging up and redialing.

Teleconferencing

Teleconferencing with Magic Number saves you valuable time when you need to coordinate a project with multiple parties. Conduct teleconferencing from any touch-tone phone.

**For all the facts on putting
Magic Number to work for you, call**

Question 6
Exhibit 6.53

MAGIC NUMBER

Magic Number puts you in control of a powerful communications tool that allows any touch-tone phone to become your instant office. Your personal 800 Magic Number eliminates the complexities of multiple and changing telephone numbers by replacing them with one constant number that sends and receives all communications. Magic Number insures 100% call completion.

Magic Number Features

Follow-Me - Route your incoming Magic Number calls to any telephone number for any period of time on demand.

Outbound Calling - Make local, long-distance, or international calls.

Voice Messaging - Receive, Send, Reply, Transfer, Future Deliver, Distribution Lists, Address Book.

Teleconferencing - Multiple-party conference calling.

Paging - Works with your pager to notify you of new and urgent messages.

Optional IntraLATA Calling Plan

US Signal's IntraLATA Calling Plan is designed for customers spending more than \$200.00 per month on IntraLATA 1+ and IntraLATA 800 calls.

WHY SHOULD YOU SUBSCRIBE?

US Signal's IntraLATA Calling Plan may ~~reduce~~ your monthly IntraLATA long distance expenses whether you are currently using US Signal, a local telephone company, or another long distance company for IntraLATA service.

By using US Signal to terminate your IntraLATA long distance calls, your volume discounts may increase! All of your domestic long distance calls with US Signal contribute toward and are eligible to receive volume discounts. In addition, with US Signal's IntraLATA Calling Plan, you will receive discounts not only on 1+ long distance calls, but on your 800 service as well.

HOW DO YOU SAVE?

Your IntraLATA long distance calls will be priced at \$0.136 per minute for 1+ calls and \$.13 per minute for 800 calls independent of rate period. With the standard US Signal 1+ Service volume discounts, these prices can be reduced to \$0.116 per minute for 1+ services and \$.1275 per minute for 800 service. Additional term discounts are also available! Unlike standard IntraLATA services from your local telephone company, US Signal rates your call in six-second increments (e.g. a one-and-a-half minute call is charged for one-and-a-half minutes, not two full minutes).

WHAT ABOUT FEES?

There is a Monthly Subscription Fee of \$5.00. There are NO sign-up fees.

ARE THERE ANY COMMITMENTS... YES!

Yours As an IntraLATA Calling Plan subscriber you must commit to one (1) full year of IntraLATA service with US Signal. Should you cancel early, there will be a \$50.00 per month charge for each remaining month.

Ours US Signal commits to provide each subscriber with the very best in long distance service quality.

To subscribe, sign US Signal's IntraLATA Calling Plan Agreement. You will soon notice a savings!!
